

YEVHEN YASHKIN

Power Platform Developer | Microsoft 365 Business Applications | Copilot Studio

PROFILE

Developer of business applications and information systems with experience in business processes, data migration, automation, and system documentation. Current focus: Microsoft 365, Power Platform, Dataverse, SharePoint, Teams, and Copilot Studio. I can structure business requirements, develop digital solutions, and enhance existing Microsoft 365 cloud solutions.

PROFESSIONAL DEVELOPMENT IN SWITZERLAND

Software House Chur / 08EINS — Professional Integration and Practical Project Work

2025 - Present

Practical customer and project work with Microsoft 365, Power Platform, and Copilot Studio.

Architecture Office Project DB

Business application for an architecture office: migration of Excel-based work processes into a structured Power Platform solution.

- Analysis of existing Excel structures and work processes.
- Migration of data from Excel to Dataverse.
- Creation of tables, relationships, forms, views, and roles.
- Development of a model-driven app for project and customer data.
- Documentation of requirements, data model, and system logic.

Meeting Transcript Assistant

Copilot Studio agent and Power Automate solution for processing meeting transcripts and creating structured meeting documents.

- Analysis of transcripts and extraction of key information.
- Creation of summaries, tasks, and next steps.
- Population of a Word template and storage in SharePoint.
- Preparation of an email for meeting participants.

Professional Integration & Microsoft Platform Development

2022 - 2025

Professional integration in Switzerland and systematic development of my experience with information systems on the Microsoft platform.

- Building practical knowledge of Microsoft 365, Power Platform, Power Apps, Power Automate, Dataverse, SharePoint, and Power Pages.
- Applying my previous experience in business processes, data structures, automation, and documentation to modern Microsoft technologies.
- Development of personal learning and demonstration projects based on practical business scenarios.
- **Successful completion of the Microsoft Power Up Program.**

PROFESSIONAL FOUNDATION

Information Systems Developer — 1C Platform

2012 - 2022

- Development and customization of information systems based on the 1C platform.
- Analysis of requirements, business processes, and data structures.
- Implementation of ERP/CRM configurations, roles, reports, and automation.
- Data migration from 1C, Excel, and legacy systems.
- Support for customers in sales, purchasing, logistics, warehouse, and reporting.

Business & Management

1996 - 2012

- Career development from Sales / Regional Manager to Executive Management.
- Practical experience in sales, e-commerce, logistics, finance, and process organization.
- Early responsibility for internal information systems.
